Your journey to better health

What's inside

When you are sick or hurt, do you know where to seek treatment?
See page 2 to learn the best place to get the care you need.

Covered care

Healthy start

See your provider for an annual wellness visit

Start the year off right by scheduling an appointment with your primary care provider. All members of your family should see their provider once a year for an annual wellness visit. This visit is a covered benefit under your health plan. During the visit, you will get any screenings or vaccines you may need. This winter, be sure to ask your provider about getting the COVID-19 vaccine and flu shot.

Need a new provider?

We can help you find one.
Chat with an advocate through
myuhc.com/communityplan
or the UHC mobile app.

Covered care

Know where to go

When you need care, going to the right place can save you valuable time. Here are some things to keep in mind when deciding where to seek treatment.

1. Primary care provider

For most illnesses and injuries, your primary care provider's office should be the first place you call. They may be able to give you advice for at-home care. They may also be able to call in a prescription to your pharmacy, if needed.

2. Urgent Care

If you cannot get in to see your provider, you could go to an urgent care center. Urgent care centers take walk-in patients for minor illnesses and injuries.

3. Emergency room (ER)

Go to the emergency room or call 911 for life-threatening issues like head injuries, severe allergic reactions, difficulty breathing, major burns or uncontrollable bleeding.

Listen to your heart

Some heart attack symptoms are different for men and women

The leading cause of death for both men and women in the U.S. is heart disease. A heart attack is often the reason. It's important to know the signs and symptoms of a heart attack.

Symptoms for both men and women can include:

- Pain that spreads to neck
- Chest pain
- Shortness of breath
- Sweating a lot
- Pain that spreads to shoulder
- Pain that spreads to arms

Women can also experience:

- Unexplained anxiety, weakness
- Dizziness, nausea
- Pain in jaw or teeth
- Pain in stomach
- Pain in back

A heart attack can occur at any age. But women usually have their first heart attack at a later age than men. The average age of a heart attack for women is 70. For men, it is age 66.

Heart smart. A healthy lifestyle can help manage heart disease. Talk to your health care provider about changes you can make to reduce your risk of having a heart attack.

Crush cancer

Screenings to find cancer early

Getting screened for cancer is very important if you are at risk. Finding cancer early makes it easier to treat. Ask your provider about these screenings during your next visit.

1. Colorectal cancer screening

Colorectal cancer screening is recommended for adults ages 45 to 75. Talk to your provider about the best screening option for you.

2. Cervical cancer screening

Women between the ages of 21 and 29 should get a Pap smear every 3 years. Then get Pap and HPV tests every 5 years between the ages of 30 and 65. Testing can end at age 65 for women with a history of normal Pap results.

3. Prostate cancer screening

Men who are between the ages of 55 and 69 should make an individual decision about being screened. If you are in this age group, talk to your provider about screening.

4. Lung cancer screening

Adults who are between the ages of 50 and 80 should ask their provider about a lung cancer screening if they have a history of heavy smoking and currently smoke (or quit within the last 15 years).

Everyday life

Are you SAD?

Tips for beating seasonal depression

Seasonal affective disorder (SAD) is a form of depression. It occurs during the cold, dark months of winter. Symptoms include sadness, being in a bad mood, oversleeping and weight gain. If you think you have SAD, try these self-care tips:

Exercise. Physical activity has been known to help people feel better and relieve stress. Taking a walk, doing yoga or swimming in an indoor pool can all get your body moving.

Spend time outdoors. Even though the sky may be cloudy during winter, outdoor light can help you feel better. Bundle up and take a walk during your lunch break. If you are stuck indoors, sit close to windows.

Take vitamins. SAD has been linked to not having enough vitamin D. Talk to your provider about taking vitamin D or other supplements.

We're here to help

Our website: myuhc.com/communityplan

Our website keeps all your health information in one place. You can find a health care provider, view your benefits or see your member ID card, wherever you are.

UnitedHealthcare app: Download on the App Store® or Google Play™

Access your health plan information on-the-go. View your coverage and benefits. Find nearby network providers. View your member ID card, get directions to your provider's office and much more.

NurseLine: 1-833-890-3050, TTY 711

When you're sick or injured, it can be difficult to make health care decisions. An experienced Nurseline nurse can help provide information and support for health situations and concerns including: minor injuries, common illnesses, choosing appropriate medical care, and recent diagnoses and chronic conditions. Simply call the toll-free number 24 hours a day, 7 days a week.

Galileo:

galileo.health/uhcnm-07-2024

High-quality primary care that's available 24 hours a day, 7 days a week. Connect with real doctors via video or chat on the Galileo app.

Community Connector:

uhc.care/HTCommConnector

UnitedHealthcare Community Resources has programs that can provide help with food, housing, paying utilities, and more, at reduced or no cost to you. Search to find help in your area.

Self Care by AbleTo: ableto.com/begin

Ease stress and boost your mood with this Self Care app that gives you emotional health tools like meditations, breathing exercises, videos, and more. You'll get personalized content and there is no cost.

Such services are funded in part with the State of New Mexico. UnitedHealthcare Community Plan of NM is a product of UnitedHealthcare Insurance Company.
