

FHIR Layer EXchange Release Notes

Released June 8, 2021

Version 1.6

New with this Release

Access Management

Member Portal

- Added support for Rocky mountain health plan members.
- Added members authorized scope categories to app details page.

Third-party Vendor Portal

- A new page called *Bulletin Board* has been added where communications to third party vendors can be posted including by not limited to release notes, planned upgrades, future enhancements etc.
- A new feature has been added call *Dashboard Banner*. This feature allows administrators to create time communications for third party vendors that will show at the top of the Dashboard page in the vendor portal. These communications will be used for alerts, such as planed system downtimes.
- The *Support* page was enhanced to allow additional information to be submitted on support ticket request.
- Additional content related updates have been made to aid in a more streamline user experience.

Operations Admin Portal

- A new page called *Bulletin Board & Dashboard Banner* has been created to allow administrative users to add Bulletin board or Dashboard banner items to the Vendor portal to aid in communication with 3rd party vendors.
- External email alerts have been added for app and org status changes and communication with application and organization owners.
- Additional content related updates have been made to aid in a more streamline user experience.

Authorization Server

- Added support for Rocky Mountain members.
- Additional claims added to access token to aid downstream data systems.

Patient Access APIs

- The USCDI version 1 Immunization Resource using the US Core version 3.1.1 is provided with the provenance transmitter for each immunization. The `_include Organization` references the immunization registry.
- The USCDI version 1 Laboratory Result Observation Resource using the US Core version 3.1.1 is provided with the provenance transmitter for each result. The `_include Organization` references the resulting lab acronym.
- The CARIN BB version 1.0.0 Explanation of Benefit for Pharmacy claims for the subscriber and patient are available. The `_include Organization Resource` includes the Pharmacy NPI, Pharmacy Full Name, Pharmacy Address, and Pharmacy Phone Number. The `_include Practitioner Resource` includes the Prescriber's NPI, Prescriber's Name, Prescriber's address, and Prescriber's Phone Number
- Procedure Resource has been modified to use Start Service Date to pull all the procedures back from 1/1/2016 instead of the Effective Date.
- Condition Resource has been modified to use Start Service Date to pull all the conditions back from 1/1/2016 instead of the Effective Date.
- Patient Resource enhanced to include patient telecom and communication attributes.

Bug Fixes

- Mitigated issue where vendors/admin users were unable to change organization name at the request of organization.
- Mitigated issue where EOB requests may timeout if a member has a large number of claims and line items. This issue has been resolved.

Known Issue

- N/A
