

2026 Illinois Traditional Large Group 3 and 4-Tier Prescription Drug List

Please note: This Prescription Drug List (PDL) is accurate as of August 1, 2026 and is subject to change after this date. All previous versions of this PDL are no longer in effect. Your estimated coverage and copay/coinsurance may vary based on the benefit plan you choose and the effective date of the plan.

The current PDL can also be accessed online at uhc.com/member-resources/pharmacy-benefits/prescription-drug-lists. Scroll down to Illinois section. An example of a plan coverage document may be accessed online at [2025-IL-LrgGrp-SBC.pdf](#).

If you are a UnitedHealthcare member, please register or log on to myuhc.com, or call the toll-free number on your member ID card to find coverage documents and pharmacy information specific to your benefit plan.

This PDL is applicable to the following health insurance products offered by UnitedHealthcare:

- Heritage Plus
- Heritage Select

Understand your medication options

Your pharmacy benefit offers flexibility and choice in determining the right medication for you. To help you get the most out of your pharmacy benefit, we've included some of the most commonly used terms and their definitions as well as frequently asked questions:

Allowed Amount is the maximum amount on which the health insurance issuer bases its payment for a covered health care service. This may be called "eligible expense", "payment allowance", or "negotiated rate". If your health care provider charges more than the allowed amount and is not part of the provider network, you may have to pay the difference.

Brand name drug is a drug that is marketed under a proprietary, trademark protected name. The brand name drug must be listed in all capital letters.

Coinsurance is a percentage of the cost of a covered health care service, which you are responsible to pay. The cost of the covered health care service is generally deemed to be the allowed amount, which may differ from the retail price that you would pay for the same service without using insurance. Typically, a coinsurance does not apply until after you have met the deductible, unless the health insurance issuer has waived or lowered the deductible for the health care service in question.

Copayment is a fixed dollar amount that you pay for a covered health care service. Typically, a copayment does not apply until after you have met the deductible, unless the health insurance issuer has waived or lowered the deductible for the health care service in question.

Covered Individual is an individual enrolled in, subscribed to, or insured under a health product, whether directly or as a dependent or beneficiary.

Deductible is the amount you pay for covered health care services before your health product begins payment for all or part of the cost of the health care service under the terms of coverage. If your health product has a deductible, it may have either one deductible or separate deductibles for medical benefits and drug benefits. For some health care services, such as preventive services, the health insurance issuer might waive or lower the deductible to pay for costs of the health care service from the first dollar of coverage, but this tends not to happen for most other covered services.

Drug Tier is a group of drugs that corresponds to a specified cost sharing tier in the health product's drug coverage. The tier in which a drug is placed determines your portion of the cost for the drug.

Exception request is a request for coverage of i) a nonformulary drug, ii) a drug being removed from the formulary, or iii) a quantity of a drug above a quantity limit. If you, your designee, or your attending or prescribing provider submits an exception request for coverage of a drug, the health insurance issuer must cover the drug when the drug is determined to be medically necessary to treat your condition.

Exigent circumstances are when you are suffering from a health condition that may seriously jeopardize your life, health, or ability to regain maximum function, or when you are undergoing a current course of treatment using a nonformulary drug.

Formulary or Prescription Drug List (PDL) is the complete list of drugs preferred for use and eligible for coverage under a health product, and includes all drugs covered under the outpatient or pharmacy drug benefit of the health product. Formulary is also known as a drug list or prescription drug list.

Generic drug is the same drug as its brand name equivalent in dosage, safety, strength, how it is taken, quality, performance, and intended use. A generic drug is listed in this PDL in ***bold and italicized lowercase*** letters.

Non-formulary drug is a drug that is not listed on the health product's formulary as a covered drug, but may become eligible for coverage under an "exception request."

Out-of-pocket cost is copayments, coinsurance, and the applicable deductible, plus all costs for health care services that the health product does not cover.

Prescribing provider is a health care provider authorized to write a prescription to treat your health condition.

Prescription is an oral, written, or electronic order by a prescribing provider for you that contains the name of the drug, the quantity of the drug, the date of issue, the name and contact information of the prescribing provider, the signature of the prescribing provider if the prescription is in writing, and if requested by you, the health condition or purpose for which the drug is being prescribed.

Prescription Drug Product is a drug that is prescribed by your prescribing provider and requires a prescription under applicable law.

Medications which, due to their traits, are administered or directly supervised by a qualified provider or licensed/certified health professional will be covered under the medical benefit when medically necessary.

Prior authorization is a health product's requirement that you or your prescribing provider obtain the health insurance issuer's authorization for a drug before the health product will cover the drug. The health insurance issuer must grant a prior authorization when it is medically necessary for you to obtain the drug.

Quantity limit – Amount of medication covered per copayment or in a specific time period. Medications with quantity limits may be dispensed in greater quantities if medically necessary and prior authorized by UnitedHealthcare.

How do I use my PDL?

When choosing a medication, you and your provider should consult the Prescription Drug List (PDL). It will help you and your provider choose the most cost-effective prescription drugs. This guide tells you if special programs apply. Bring this list with you when you see your provider. It is organized by therapeutic category and class. The therapeutic category and class are based on the AHFS Pharmacologic-Therapeutic Classification.

You may also find a drug by its brand or generic name in the alphabetical index. If a generic equivalent for a brand name drug is not available on the market or is not covered, the drug will not be separately listed by its generic name.

This is the way Prescription Drug Products appear in the PDL:

1. A drug is listed alphabetically by its brand and generic names or, if only the generic equivalent is covered under the plan, then just by its generic name, in the therapeutic category and class to which it belongs;
2. The generic name for a brand name drug is included after the brand name in parentheses and all bold and italicized lowercase letters;
3. If a generic equivalent for a brand name drug is both available and covered, the generic drug will be listed separately from the brand name drug in all bold and italicized lowercase letters; and
4. In the event a generic drug is marketed under a proprietary, trademark protected brand name, the brand name will be listed in all CAPITAL letters after the generic name in parentheses and regular typeface with first letter of each word capitalized.

Example:

Prescription drug name	Drug tier	Coverage requirements & limits
AVAPRO ORAL TABLET 150 MG, 300 MG, 75 MG <i>(irbesartan)</i>	3/4	
<i>irbesartan oral tablet 150 mg, 300 mg, 75 mg</i>	1	

If your medication is not listed in this document, please visit myuhc.com or call the toll-free member phone number on your member ID card.

Below is a list of drug tier numbers, abbreviations and designations used in the PDL as well as an explanation for each. If you have a plan with 3 Tiers, Tier 3/4 drugs will be placed on Tier 3. If you have a plan with 4 Tiers, Tier 3/4 drugs will be placed on Tier 4.

Drug Tier 1	Your lowest cost medications	SP	Specialty medication
Drug Tier 2	Your mid-range cost medications	CM	Orally administered anti-cancer medication
Drug Tier 3	Your mid-range to high-cost medications	SMCS	Specialty medication cost share may apply
Drug Tier 3/4	Your highest cost medications	E	Excluded from coverage unless covered as part of health care reform preventive
PA	Prior authorization required	SM	Cost-share cap by state mandate applies when condition appropriate
QL	Quantity limit		
H	Part of health care reform		
H-N	Part of health care reform preventive with confirmation of age and/or condition appropriate preventive use		

What are tiers?

Tiers are the different cost levels you pay for a medication. Each tier is assigned a cost, which is determined by your employer or health plan. This is how much you will pay when you fill a prescription. Tier 1 medications are your lowest-cost options. If your medication is placed in Tier 2, 3 or 3/4, look to see if there is a Tier 1 option available. Discuss these options with your provider.

Check your benefit plan documents to find out your specific pharmacy plan costs, including any maximum dollar amount of cost sharing that may apply to a drug. Preferred medications are found in Tier 1, Tier 2 or Tier 3 and may vary depending on the medication and the condition it treats.

\$	Drug tier	Includes	Helpful tips
\$	Tier 1 Your lowest cost	Medications that provide the highest overall value. Mostly generic drugs. Some brand name drugs may also be included.	Use Tier 1 drugs for the lowest out-of-pocket costs.
\$\$	Tier 2 Your mid-range cost	Medications that provide good overall value. Mainly preferred brand name drugs.	Use Tier 2 drugs instead of Tier 3 or 3/4 to help reduce your out-of-pocket costs.
\$\$\$	Tier 3 and 3/4 Your highest cost	Medications that provide the lowest overall value. Mainly non-preferred brand name drugs.	Many Tier 3 and 3/4 drugs have lower-cost options in Tier 1 or 2. Ask your provider if they could work for you.

Please note: If you have a high deductible plan, the tier cost levels may apply once you reach your deductible. Your cost-share will not exceed the lesser of the cost-sharing amount or the retail price of the medication without the drug coverage. Refer to your enrollment and plan materials on myuhc.com, or call the toll-free number on your member ID card for more information about your benefit plan. For information related to specialty medication cost share, please refer to the Specialty Medication Cost Share (SMCS) section below.

When does the PDL change?

This PDL is required to be updated on a monthly basis.

- Medications may move to a lower tier or coverage may be added at any time.
- Medications may move to a higher tier when a generic becomes available.
- Medications may move to a higher tier, become non-formulary, or the dosage form covered may change, most often on Jan. 1, May 1, or Sept. 1.
- Medications may be subject to new or updated utilization management requirements at any time. This includes prior authorization or quantity limits. These changes most commonly occur upon FDA approval of a medication or its generic equivalent, or on scheduled update dates: Jan. 1, May 1, or Sept. 1.

When a medication changes tiers, you may have to pay a different amount for that medication.

The presence of a Prescription Drug Product on the PDL does not guarantee that you will be prescribed that Prescription Drug Product by your provider for a particular medical condition.

Additional programs and details

Based on your benefit, the following may apply.

Patient Protection and Affordable Care Act (PPACA) zero cost-share preventive care medication when age and/or condition appropriate – This medication is part of a health care reform preventive benefit and may be available at no cost to you when used for appropriate preventive purposes. PPACA zero cost-share preventive care medications can be obtained, free of charge, at network pharmacies with a prescription from a prescribing provider. A prescription will not be required to trigger coverage of over-the-counter FDA-approved contraceptive drugs, devices, and products. PPACA zero cost-share preventive care medications are obtained at a network pharmacy with a prescription order or refill from a provider and are payable at 100% of the prescription drug charge (without application of any Copayment, Coinsurance, Deductible) as required by applicable law under any of the following:

- Evidence-based items or services that have in effect a rating of "A" or "B" in the current recommendations of the United States Preventive Services Task Force
- Immunizations that have in effect a recommendation from the Advisory Committee on Immunization Practices of the Centers for Disease Control and Prevention with respect to the individual involved
- With respect to infants, children and adolescents, evidence-informed preventive care and screenings provided for in the comprehensive guidelines supported by the Health Resources and Services Administration
- With respect to women, such additional preventive care and screenings as provided for in comprehensive guidelines supported by the Health Resources and Services Administration

A complete list of PPACA zero cost-share preventive care medications covered under the outpatient prescription drug benefit can be found at myuhc.com.

State mandated \$0 cost-share cap when condition appropriate – This medication is mandated to be covered at \$0 cost-share when used for any of the following conditions:

- Abortion*
- Gender Dysphoria*
- Human Immunodeficiency Virus (HIV) Prevention
- Naloxone

These medications are mandated to have the cost-share capped:

- Insulin \$35 max per one month supply
- Epinephrine injectors \$60 max per twin-pack

***Please note:** If you have a high deductible plan, \$0 cost-share will not apply until your deductible has been met.

Specialty Medication Cost Share (SMCS) – Specialty medication cost share may apply. Please refer to the Pharmacy Schedule of Benefits for specific cost share.

To learn more about a pharmacy program or to find out if it applies to you, please visit myuhc.com or call the toll-free member phone number on your member ID card. If you are a pre-enrollee and you would like to learn more about your specific pharmacy benefit, please contact your employer.

Drugs administered by a health care professional are generally covered under the medical benefit while drugs that are self-administered are covered under the pharmacy benefit. In order to obtain medical benefits for drugs that are administered by a health care professional, your provider may also be required to obtain a prior authorization. The provider may contact UnitedHealthcare for more information or uhcprovider.com.

Your right to request access to a non-formulary drug

This plan must cover all medically necessary Prescription Drug Products.

When a Prescription Drug Product is not on our PDL, you or your representative may request an exception to gain access to that Prescription Drug Product. To make a request, contact us in writing or call the toll-free number on your member ID card. We will notify you of our determination within 72 hours. If approved, we will cover the Prescription Drug Product for the duration of the prescription, including refills.

Urgent requests

If your request requires immediate action and a delay could significantly increase the risk to your health, or the ability to regain maximum function, call us as soon as possible. We will provide a written or electronic determination within 24 hours. If approved, we will cover the Prescription Drug Product for the duration of the exigency.

External review

If you are not satisfied with our determination of your exception request, you may be entitled to request an external review. You or your representative may request an external review by sending a written request to us to the address set out in the determination letter or by calling the toll-free number on your member ID card. The Independent Review Organization (IRO) will notify you of its determination within 72 hours.

Expedited external review

If you are not satisfied with our determination of your exception request and it involves an urgent situation, you or your representative may request an expedited external review by calling the toll-free number on your member ID card or by sending a written request to the address set out in the determination letter. The IRO will notify you of our determination within 24 hours.

If we deny your exception request, you may appeal. Please refer to your Evidence of Coverage for details. The complaint and appeals process, including independent review, is described under Section 6: Questions, Complaints and Appeals. You may also call the telephone number listed on your member ID card.

Requesting a prior authorization

Before certain Prescription Drug Products are dispensed to you, your prescribing provider or your pharmacist is required to obtain prior authorization from us. Your prescribing provider can submit a request by phone to Optum Rx® or electronically by contacting us at [ProviderPA.com](https://www.providerpa.com). Most authorizations are completed within 24 hours. The most common reason for delay in the authorization process is insufficient information. Your prescribing provider may need to provide information on diagnosis and medication history and/or evidence in the form of documents, records or lab tests which establish that the use of the requested Prescription Drug Product meets plan criteria. You may determine whether a particular Prescription Drug Product is subject to prior authorization by going online at myuhc.com or by calling at the toll-free phone number on the back of your member ID card.

Approvals for maintenance medications used to treat a chronic or long-term condition will be valid for at least 12 months. All other approvals, except for benzodiazepines and Schedule II narcotic drugs, will be valid for the lesser of six months, the length of treatment determined by your prescribing provider, or the renewal of your plan.

In the case of a standard prior authorization, we will notify you, your designee, or your prescribing provider of the Benefit determination no later than 72 hours following receipt of the request. In the case of an expedited prior authorization request based on exigent circumstances, we will notify you, your designee, or your prescribing provider of the Benefit determination no later than 24 hours following receipt of the request. If we fail to respond to you, your designee, or your prescribing provider within the prescribed time limits, the request is deemed approved and we may not deny the request thereafter.

If you disagree with a determination, you can request an appeal. The complaint and appeals process, including independent medical review, is described in the Evidence of Coverage under Section 6: Questions, Complaints and Appeals. You may also call at the telephone number on your member ID card.

How do I locate and fill a prescription through a retail network pharmacy?

UnitedHealthcare has a well-established network of pharmacies including most major pharmacy and supermarket chains as well as many independent pharmacies. For a listing of network pharmacies, call the toll-free phone number on your member ID card to help locate a network pharmacy near you or visit our website at myuhc.com > **Find a pharmacy** for an up-to-date list.

Prescription delivery options

You have choices on where to fill prescriptions you take regularly. You have the option to fill at a retail pharmacy or have them mailed to your home. It's up to you. Optum® Home Delivery Pharmacy is one of your network options. There may be other options in your network. Sign in at myuhc.com > **Pharmacies & Prescriptions** > **Find a pharmacy**.

How do I locate and fill a prescription through the mail order pharmacy?

UnitedHealthcare offers a Mail Order Pharmacy Program. Here's how to fill prescriptions through Optum Home Delivery Pharmacy.

You can start a new prescription or refill an existing one in several ways:

- **E-prescribe:** Ask your provider to send prescriptions directly to Optum Home Delivery Pharmacy (usually up to a 90-day supply).
- **Online:** Visit myuhc.com > **Pharmacies & Prescriptions** > **Rx Account** to set up an account. Then choose which medication you want moved to home delivery.
- **Phone:** Call Optum Rx at **1-888-658-0539** / TTY **711**, any day, any time.

Most prescriptions arrive within about 5 business days once Optum receives the completed order.

How do I get updated information about my pharmacy benefit?

Since the PDL may change during your plan year, we encourage you to visit myuhc.com or call the toll-free member phone number on your member ID card for more current information.

You will receive sixty days notice if one of the following changes impacts you:

- A medication is moved to a higher tier*
- A medication becomes non-formulary*
- A medication becomes subject to new or revised utilization management procedures

***Please note:** You may be able to continue coverage of the medication at the same cost-share if your provider provides notice of medical necessity.

Sign in to myuhc.com for the following pharmacy information and tools:

- Pharmacy benefit and coverage information
- Possible lower-cost medication options
- Medication interactions and side effects
- Participating retail pharmacies by ZIP code
- Your prescription history

And, if mail order services are included in your pharmacy benefit, you can also:

- Refill prescriptions
- Check the status of your order
- Set up reminders for refills
- Manage your account
